Pitch Deck

9th March 2025

Agenda

01 Company Introduction

02 Problem we are Solving

03 Solution and Competition

04 Market Size

05 Traction and Roadmap

06 Funding requirements

07 Founder Profile

Introduction

What is NeuroSecure?

A Security First Gen AI solutions company that enables startups and Small Businesses to build Personalised AI Assistants and Agents Keeping Data Security in Mind

Problem we are Solving

Unavailability Personalised AI Assistants

Huge confusion due to over supply of AI assistants such as ChatGPT, Cluade, Mistral, Deepseek, Grok, Model Hallucinations, EU AI act make it difficult to select + Prompts

Data Theft

Large Providers using user data without consent to train models makes it difficult to trust them

Unavailibility of DIY solutions

Large models like chatgpt and claude are still propriety, require expensive cloud solutions to run on and even if some offer opensource not as good the propriety modesl

Solution

Personalised Solution

Preselected models wiht customisable prompts

Advance Data Encryption

Data stored on european servers, with fully opensource software solution in development available to run on the end users device

Opensource

Opensource software and model, pricing based on on usage
